1.0

Sobre – descubra SpringerLink

The screenshot shows the SpringerLink website interface. At the top, the address bar displays `link.springer.com`, with a callout box pointing to it that says "URL: link.springer.com". The website header includes the SpringerLink logo, navigation links for "Sign up / Log in", "English", and "Academic edition", a search bar, and the Springer logo. Below the header, there are links for "Home" and "Contact Us".

The main content area is divided into two columns. The left column, titled "Browse by discipline", lists various fields of study with blue arrows pointing to the right:

- » Biomedicine
- » Business and Management
- » Chemistry
- » Computer Science
- » Earth Sciences
- » Economics
- » Education
- » Engineering
- » Environment
- » Geography
- » History
- » Law
- » Life Sciences
- » Literature
- » Materials Science

The right column features a large text block: "Providing researchers with access to millions of scientific documents from **journals, books, series, protocols** and reference works." Below this text are two book covers: "COMPUTER VISION" and "Adaptive Hybrid Active Power Filters". To the right of the book covers is a purple box with the text: "New books and journals are available every day." At the bottom of the right column, the text "Featured Journals" is visible.

Sobre – usted en primer lugar

The screenshot shows the Springer Link search interface. At the top left is the Springer Link logo, featuring a chess knight icon and the text "Springer Link". Below the logo is a search bar containing the text "diabe". To the right of the search bar is a blue search button with a magnifying glass icon. Below the search bar, a dropdown menu displays a list of search suggestions:

- Diabetes Therapy
- International Journal of **Diabetes** in Developing Countries
- Cardiovascular **Diabetology**
- Nederlands Tijdschrift voor **Diabetologie**
- Diabetology** International

Sugerencias automáticas para búsquedas (basadas en palabras claves)

The screenshot shows a search filter option. On the left, there is a yellow box containing a lock icon, the text "Include Preview-Only content", and a checked checkbox. To the right of this box, the text "466,913 Result(s) for 'diabetes'" is displayed.

Desactive la opción Preview-Only para limitar los resultados de búsqueda a los contenidos licenciados

Validation of macromolecular flexibility in solution by small-angle X-ray scattering (SAXS)

Authors: Michel Hammel

Open Access | Review | 2.2k Downloads | 54 Citations

First Online: 26 May 2012

Abstract

The dynamics of macromolecular conformations are critical to the action of cellular networks. Solution X-ray scattering studies, in combination with macromolecular X-ray crystallography (MX) and nuclear magnetic resonance (NMR), strive to determine complete and accurate states of macromolecules, providing novel insights describing allosteric mechanisms, supramolecular complexes, and dynamic molecular machines. This review addresses theoretical and practical concepts, concerns, and considerations for using these techniques in conjunction with computational methods to productively combine solution-scattering data with high-resolution structures. I discuss the principal means of direct identification of macromolecular flexibility from SAXS data followed by critical concerns about the methods used to calculate theoretical SAXS profiles from high-resolution structures. The SAXS profile is a direct interrogation of the thermodynamic ensemble and techniques such as, for example, minimal ensemble search (MES), enhance interpretation of SAXS experiments by describing the SAXS profiles as population-weighted thermodynamic ensembles. I discuss recent developments in computational techniques used for conformational sampling, and how these techniques provide a basis for assessing the level of the flexibility within a sample. Although these approaches sacrifice atomic detail, the knowledge gained from ensemble analysis is often appropriate for developing hypotheses and guiding biochemical experiments. Examples of the use of SAXS and combined approaches with X-ray crystallography, NMR, and computational methods to characterize dynamic assemblies are presented.

Abstract

Structural instability of polymers under strong acidic condition severely limits their application in the field of environment. A synthetic strategy for the preparation of poly(*m*-phenylenediamine)/reduced graphene oxide (PmPD/rGO) composites was proposed for Cr(VI)

The screenshot shows the Springer Link homepage. At the top left is the Springer Link logo. To the right are links for 'Sign up / Log in', 'English', and 'Academic edition'. Below the logo is a search bar labeled 'Search' with a magnifying glass icon and a settings gear icon. A navigation bar contains 'Home' and 'Contact Us'. On the left side, there is a 'Browse by discipline' menu with a list of subjects. The main content area features a large banner with the text 'Providing researchers with access to millions of scientific documents from journals, books, series, protocols and reference works.' Below this banner are two book covers: 'LMP Letters in Mathematical Physics' and 'DISASTER RELIEF AID'. To the right of these covers is a purple box with the text 'New books and journals are available every day.' Below the banner is a 'Featured Journals' section with four journal covers: 'MULTIDIMENSIONAL SYSTEMS AND SIGNAL PROCESSING', 'International Journal of Thermophysics', 'Theory of Computing Systems', and 'Journal of Dynamical and Control Systems'. At the bottom is a 'Featured Books' section.

Opciones de filtros

Hay opciones previamente definidas en los filtros a la izquierda. Ellas te ayudarán a mejorar sus resultados de búsqueda

Las opciones de filtro abajo están disponibles:

- Tipo de contenido
- Disciplina
- Sub-disciplina
- Idioma

Página inicial – opción de organización de resultados

The screenshot shows a search results interface. At the top, it displays "354,265 Result(s) within Business and Management". Below this, there are two main control areas: "Sort By" and "Date Published". The "Sort By" dropdown is set to "Newest First". The "Date Published" section includes a date range filter set to "between 1852 and 2019". A dropdown menu is open under "Date Published", showing options: "between", "between", and "in". The "in" option is highlighted. Below the controls, two book results are visible: "Business Process Crowdsourcing" and "Managing Sustainable Business".

Por defecto, los resultados de búsqueda se organizan por “más recientes primero”

Las opciones son:

- Más recientes primero
- Más antiguos primero

También es posible hacer la búsqueda solo dentro de un determinado período de fechas

Journal of Cancer Education

ISSN: 0885-8195 (Print) 1543-0154 (Online)

Description

This journal presents research that aims to improve current cancer education techniques and solve current problems that exist in educating patients, and strengthening existing programs. The Journal of Cancer Education serves as the ideal source to educate physicians, dentists, nurses, students, social workers as well as other allied health professionals, patients, and the general public in various aspects of cancer education ... Abstract

Nodal root angle in sorghum influences vertical and horizontal root distribution in the soil profile and is thus relevant to drought adaptation. In this study, we report for the first time on the mapping of four QTL for nodal root angle (*qRA*) in sorghum, in addition to three QTL for root dry weight, two for shoot dry weight, and three for plant leaf area. Phenotyping was done

(1) Introduction

This book addresses the urgent and complex threats and challenges to the world's forests posed by the four great problems of the age: climate change, conservation objectives and sustainable development needs, and the growing demand for affordable energy. The intention is to outline the research and other efforts that are needed to understand how these issues will affect the world's forests along with the options and difficulties for dealing with them, as well as the opportunities that the world's forests and production forestry can offer for tackling these very issues.

- (6) Abstract
- This chapter argues that experiences are dynamic and emotional in nature and should be conceptualized as a series of ‘micro-events’ during the trip. Further, the advent of new sensor technology provides new tools for understanding the ways in which these experiences—events are perceived and the meanings created hold great promise in addressing a number of critical questions empowering the design of tourism places. We then describe traveler experiences through a series of case studies.

About this series (4)

The Cognitive Systems Monographs (COSMOS) publish new developments and advances in the fields of cognitive systems research, rapidly and informally but with a high quality. The intent is to bridge cognitive brain science and biology with engineering disciplines. It covers all the technical contents, applications, and multidisciplinary aspects of cognitive systems, such as Bionics, System Analysis, System Modelling, System Design, Human Motion, Understanding, Human Activity Understanding, Learning of Behaviour, Man-Machine Interaction, Smart and Cognitive Environments, Human and Computer Vision, Neuroinformatics, Humanoids, Biologically motivated systems and artefacts Autonomous Systems, Linguistics, Sports Engineering, Computational Intelligence, Biosignal Processing, or Cognitive Materials - as well as the methodologies behind them. Within the scope of the series are monographs, lecture notes, selected contributions from specialized conferences and workshops, as well as selected PhD theses.

Introduction

Evolutionary psychology is a hybrid discipline that draws insights from modern evolutionary theory, biology, cognitive psychology, anthropology, economics, computer science, and paleoarchaeology. The discipline rests on a foundation of core premises: 1. Manifest behavior depends on underlying psychological mechanisms, information processing devices housed in the brain, in conjunction with the external and internal inputs that trigger their activation. 2. Evolution by selection is the only known causal process capable of creating such complex organic mechanisms. 3. Evolved psychological mechanisms are functionally specialized to solve adaptive problems that recurred for humans over deep evolutionary time. 4. Selection designed the information processing of many evolved psychological mechanisms to be adaptively influenced by specific classes of information from the environment. 5. Human psychology consists of a large number of functionally specialized evolved mechanisms, each serving particular forms of contextual input, that get combined, coordinated

(6) **Abstract**

Bacterial Artificial Chromosome (BAC) libraries are a valuable research resource. Any one of the clones in these libraries can carry hundreds of thousands of base pairs of genetic information. Often the entire coding sequence and significant upstream and downstream regions, including regulatory elements, can be found in a single BAC clone. BACs can be put to many uses, such as to study the function of human genes in knockout mice, to drive reporter gene expression in transgenic animals, and for gene discovery. In order to use BACs for experimental purposes it is often desirable to genetically modify them by introducing reporter elements or heterologous cDNA sequences. It is not feasible to use conventional DNA cloning approaches to modify BACs due to their size and complexity, thus a specialized field “recombineering” has developed to modify BAC clones through the use of homologous recombination in bacteria with short homology regions. Genetically engineered BACs can then be used in cell culture, mouse, or rat models to study cancer, neurology, and genetics.

Función Usuario Administrador – pestaña Configuraciones

The screenshot shows the Springer Admin interface. At the top left is the Springer logo and the text "Springer Admin". Below this is a navigation bar with links: Home, My Organisation, Usage, Title Lists, and Settings. The main content area is titled "Institution" and shows a dropdown menu with the selected value "Acme test | 3000776049". Below this is a section titled "SpringerLink settings" with a blue arrow icon. Underneath, there is a paragraph: "Some features on the SpringerLink platform can be toggled on or off according to the needs of your organisation:". This is followed by four unchecked checkboxes with labels: "Prevent automatic association of any user who registers within the IP range of my organisation?", "Force my users to log in before downloading full-text content?", "Display a warning notification before downloading full-text content if I have deposit-based contracts?", and "Display a library endorsement on subscription content pages". Below the checkboxes is a text input field containing "Acme Test University Libraries" and a "Save" button.

Las opciones se explican con más detalles al pasar el mouse sobre cada una de ellas

Por ejemplo, exhibición de nombres de la institución y branding de la biblioteca
